

A summary of the above results is given Table 1.

Table 1. Summary of UNDP funded Emergency Arsenic Mitigation Project in 500 villages

Description	Quantity	Remarks
Total number of Districts	29	
Total number of Thanas	68	
Total number of Unions	108	
Total number of Villages	497	Incomplete or missing data in 3 villages
Total number of Families	177,842	In 497 villages
Total Population	818,924	In 497 villages
Total number of Tube wells	62,782	In 497 villages
Population per TW	13	In 497 villages
Number of Tested TWs	61,631 (98.17%)	% out of total TWs in 497 villages
Number of Damaged TWs	1,151 (1.83%)	% out of total TWs in 497 villages
Number of TW found Arsenic Positive	32,154 (52.17%)	% out of tested TWs in 497 villages
Number of TW found Arsenic Negative	29,477 (47.83%)	% out of tested TWs in 497 villages
Government installed TWs	6,636 (10.57%)	% out of total TWs in 497 villages
NGO & privately installed TWs	56,146 (89.43%)	% out of total TWs in 497 villages
Total number of Patients	2,327 (0.28%)	% out of total pop. in 497 villages
Male	1,373 (59.00%)	% out of total patient in 497 villages
Female	791 (33.99%)	% out of total patient in 497 villages
Children	163 (9.05%)	% out of total patient in 197 villages only
Patient/1000 population	2.81	In 497 villages
Total Population at risk	459,833 (56.15%)	% out of total pop. in 497 villages
Number of villages with >50 patient	12 (2.41%)	% out of 497 villages
Number of villages with 21-50 patient	20 (4.02%)	% out of 497 villages
Number of villages with 1-20 patient	155 (31.19%)	% out of 497 villages
Number of villages with 0 patient	310 (62.37%)	% out of 497 villages
